

2.0 Platform newly added

“Assets Sharing Wallet”

All major wallets, including FD, DeFi, and digital bank registration deposits will be unlocked for previous generation members in 1.0

Unlocking method

There are two ways to unlock and release the principal, which can be used for liquidation or intra-ecological transactions and financial management :

Unlocking method 1:

Average sharing unlocking method: Once the MT5 is up and running, based on the RM & GM ranking in 2.0 as the standard for calculation. If they have met the requirement of \$5 million in new sales, they can unlock \$100,000 for their team as reward withdrawal distribution. If there's any stacking, aside from the group of RM, other team's sales performance has to be at least \$3 million in order to obtain the same \$100,000 reward withdrawal release. This unlock is executed once a month.

All major wallets, including FD, DeFi, and digital bank registration deposits will be unlocked for previous generation members in 1.0

Unlocking method

There are two ways to unlock and release the principal, which can be used for liquidation or intra-ecological transaction and financial management :

Example :

30% of the 100,000 bonus is 30,000 USD

Global Manager	USD\$10,000 (Divided equally according to the number of Global Managers who meet the standard)
Regional Manager	USD\$8000 (Divided equally according to the number of Regional Managers who meet the standard)
Unit Manager	USD\$6000 (Divided equally according to the number of Unit Managers who meet the standard)
Agency Manager	USD\$4000 (Divided equally according to the number of Agency Managers who meet the standard)
Agent	USD\$2000 (Divided equally according to the number of Agents who meet the standard)

Based on the RM & GM ranking in 2.0 as the standard for calculation

Distributed based on his own team members:

30% will first be distributed to those who participated in Green channel program, in the following sequence:

GM	RM	UM	AM	AGENT
10%	8%	6%	4%	2%

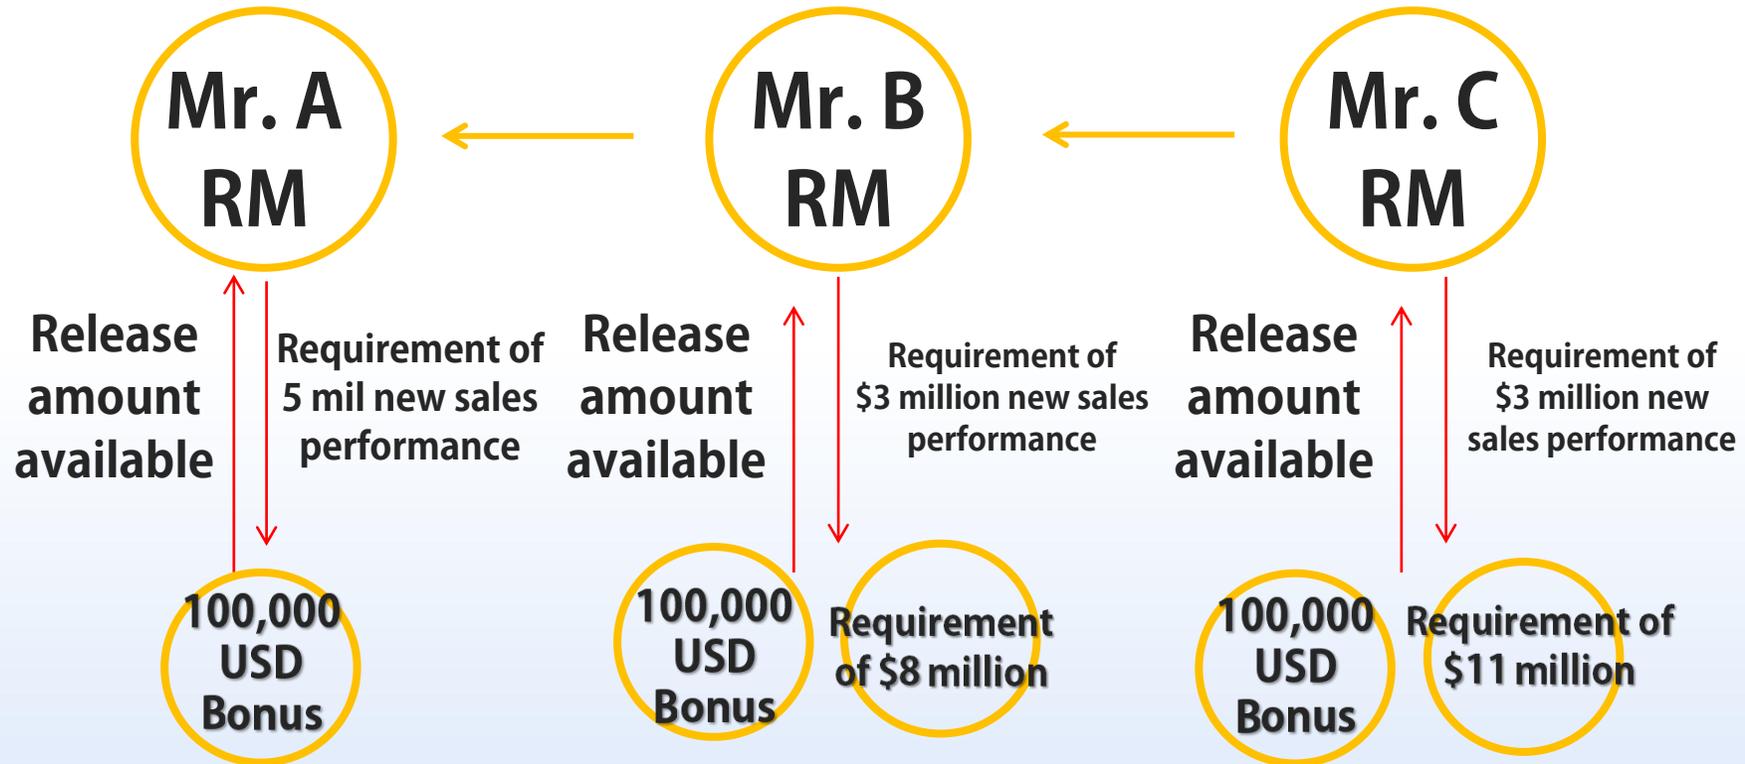

The remaining **70%** will be distributed to all others members, including those who did not participate in FX (member, Agent, AM, UM, RM, GM).

If there is no GM, the 10% will be divided among all the other members, **distributed from 80% instead of 70%**

That means, those who participated in forex will have two kinds of calculation **[30% & 70%]**

Based on the RM & GM ranking in 2.0 as the standard for calculation

Mr. C recommends Mr. B, Mr. B recommends Mr. A

All major wallets, including FD, DeFi, and digital bank registration deposits will be unlocked for previous generation members in 1.0

Unlocking method

There are two ways to unlock and release the principal, which can be used for liquidation or intra-ecological transaction and financial management :

Unlocking method 1:

Average sharing mechanism: After MT5 goes online, the company's foreign exchange MT5 2.0 will unlock the release of USDT equivalent to USD 100,000 for every USD 5 million worth of newly added sales performance.

70% of the remaining release quota will be shared equally among all active users of GIB1.0 from your team, and will be unlocked once a month

Example :

70% of the 100,000 bonus is 70,000 US dollars

Assumption: There are 40,000 active users of GIB1.0 from your team that month,

The 70,000 U.S. dollars will be divided equally among 40,000 people.

All USDT unlocked and released with the equivalent value of US dollars are newly added into the "Asset Sharing Wallet" (Users can freely choose to unlock and withdraw cash in the major wallet combinations of the 1.0 platform according to the newly added "Asset Sharing Wallet")

All major wallets, including FD, DeFi, and digital bank registration deposits will be unlocked for previous generation members in 1.0

Unlocking method

There are two ways to unlock and release the principal, which can be used for liquidation or intra-ecological transaction and financial management :

Unlocking method 2 :

Unlocking transaction liquidity financial management according to the deposit in the exchange area to participate in the transaction of different types of digital assets to obtain financial products, and reach a certain limit requirement, different proportions of USDT will be released from the frozen wallet.

For example: trading mainstream currencies, stake mining, liquidity mining, DeFi, holding interest-earning wealth management plan

**OKex function, computing power cloud mining,
Platform currency staking new launch
For Launchpad**

The release ratio is also not the same.

Regarding the new "Asset Sharing Wallet" and all the details of the previous generation member 1.0 wallets, including FD and digital bank registration deposits, we will publish all details in an official announcement via the business academy after GIBXCHANGE is officially launched.

GUSDT™

2.0 ERA

**Currently, it will be open to all users who have participated
in the foreign exchange 2.0 to arbitrage.**

GIBX 2.0

Take the lead in launching two major policies to maximize the current and future value of GUSDT™!

Policy 1:

- ① **Deposit and earn interest and guaranteed 1U plan: Members participating in the guaranteed 1U plan can stake the GUSDT™ to be locked within the mining pool**

18% APY (48 weeks)

0.375% of revenue weekly

When the currency price is lower than 1U, the exchange will give 1U guaranteed cash out and directly distribute U. When the currency price is higher than 1U, the exchange will give the corresponding U according to the market price (at the market price of each interest payment)

100% of the principal due in 48 weeks will be returned in GUSDT. 100% Optional reinvestment

Example 1:

10,000 GUSDT staking

The platform will directly give 37.5 U to the user's account at the price of 1U/G

Example 2:

10,000 GUSDT staking

The platform will directly give 56.25 U of 37.5 G to the user's account at the price of 1.5U/G

Policy 2:

- ① **Holding currency dividend: Participate in the transaction holding currency and store it in the exchange wallet to get the internal 1.0 withdrawal release**

A

0.2% of the total trading volume of GIBXCHANGE every week, the processing fee is distributed to all wallets that have G coins on the exchange

B

Each week, the percentage of the total transaction volume of personal holdings and GUSDT™ will be used to get the commission dividend

Policy 2:

- ① **Holding currency dividend: Participate in the transaction holding currency and store it in the exchange wallet to get the internal 1.0 withdrawal release**

C

Only need to hold the currency to be released internally every week, without any buying/selling

D

Users can settle dividends based on the total amount of currency held by the entire "directly affiliated genealogy tree"

Example 1:

First week GUSDT™ :

0.2 % transaction fee = USD\$200,000

$100,000 / 10,000,000 = 1\%$

Transaction fees bonus = $200,000 \times 1\% = \text{USD\$2,000}$

Eg:
The total transaction volume is 100 million U.S. dollars
The total holdings are 10 million coins

Member A
community

Total holding of
100,000
GUSDT™

Second week GUSDT™ :

0.2 % transaction fee = USD\$100,000

$200,000 / 5,000,000 = 4\%$

Transaction fees bonus = $100,000 \times 4\% = \text{USD\$4,000}$

Eg:
The total transaction volume is 50 million U.S. dollars
Total currency holdings 5 million coins

Member A
community

Total holding of
200,000
GUSDT™

Third week GUSDT™ :

0.2 % transaction fee = USD\$300,000

$500,000 / 100,000,000 = 0.5\%$

Transaction fees bonus = $300,000 \times 0.5\% = \text{USD\$1,500}$

Eg:
The total transaction volume is 150 million U.S. dollars
Total holdings of 100 million coins

Member A
community

Total holding of
500,000
GUSDT™

Platform Staking newly launched Launchpad

The Launchpad issuance model adopts the investment issuance distribution model. Users need to use GUSDT™ to participate in token investment, and the tokens will be distributed according to the holding ratio. That is, the allocation is based on the ratio of the number of GUSDT™ purchased by users to the total number of GUSDT™ purchased by all users. Through GUSDT™, participating users will stake the platform coins GUSDT™ and "X" to obtain the "Launchpad New Rights", and the new release will be released for a limited period and directly designated for a limited period of time to be locked up.

GIBXSWAP-DEX

Is about to arrive!

**Creating yet another
glorious legend!**

GIBX fully acquired GX.COM And will change the name to GIBXChange

**In 2021, in addition to the CEX exchange, GIBXChange,
The new DEX decentralized exchange-GIBXSWAP will also be launched soon.
GIBXSWAP is committed to building a DeFi platform integrating DEX, IMO, and
DAO.**

**The next step is to become the next MDEX,
and become a unique dominator in DeFi in 2021!**

CEX

GIBXCHANGE !

User uses GUSDT™ for paying transaction fees can enjoy **25%** discount

Invitational rebate: GUSDT™ holdings that met the requirement, enjoy double commission rebate; referrer reward implementation mechanism

If GUSDT™
Holding volume meets the requirement,
Level up to the VIP level

CEX
GIBXChange
Digital bank exchange platform functions

Okex earns interest by holding currency (GUSDT™, X), users do not need to transfer to the wealth management function, and the income can be deposited into the currency account

Holding interest-earning wealth management plan: deposit GUSDT™, harvest GUSDT™, and issue at annualized interest rates; also deposit GUSDT™, X to harvest other currencies

The newly launched GIBXCHANGE will specially introduce an innovative and subversive contract trading model on the existing basis! The new quantitative position compensation contract (split second winning or losing, compensation policy), the platform will be launched in the GUSDT™ trading zone soon!

SPAC

Digital bank will use SPAC

“Special Purpose Acquisition Company” to be Listed on Nasdaq

What is SPAC ?

SPAC listing v.s.

**Reverse
takeover**

SPAC ("Special Purpose Acquisition Company")

(**Special Purpose Acquisition Company, SPAC**) It is a shell company with no operating business, also known as a "blank cheque company"

It is an investment tool that provides listed financing for enterprises. The only purpose is to specifically acquire prospective unlisted companies after raising funds through Initial Public Offering (IPO), which is equivalent to allowing the acquired company to do a backdoor listing.

In other words: SPAC is a company that allows private companies to perform a "backdoor listing" aka reverse takeover.

Medical Cannabis

**U.S. legalization speeds up, the cannabis
industry enters a golden age**

Investment Highlights

THE LEGALIZATION OF CANNABIS IN MAJOR COUNTRIES AND THE U.S.A. CONTINUES TO ADVANCE

THE KEY TO INCREASING SOCIAL ACCEPTANCE: THE MEDICAL VALUE OF CANNABIS IS TAPPED. ONE OF THE IMPORTANT REASONS FOR THE ADVANCEMENT OF CANNABIS LEGALIZATION IS THAT THE MEDICAL POTENTIAL OF CANNABINOIDS IS GRADUALLY BEING STUDIED AND VERIFIED.

SPAC mergers and acquisitions are becoming the main way to invest in medical cannabis industries

At present, the company has entered the final stage to be listed on OTCQB, after the foreign exchange 2.0 goes online

The bank will start issuing equity certificates to members who have previously registered on the 1.0 platform and meet the requirements

The company will announce all the details about the SPAC IPO in the near future

The listing of Nasdaq through SPAC this time. It is estimated that every member who holds GUSDT™ will be allotted shares. Expecting at least 4 times return

Global partners who meet the criteria will have allocated dividends as cornerstone investors, with an estimated return of at least 10 times

At the same time, the qualified partners will ring the listing bell with us as the management when we visits Nasdaq.

**GIBX WILL BE LISTED IN
THE WORLD'S
LARGEST FINANCIAL MARKET
*NASDAQ IPO***
