## OUR VISION

## ABOUT US

We believe that we can make the world a more enjoyable place through gaming. We also believe that the era of Pay to Win games, rich get richer, will fade and a new era of Play-to-Earn (P2E) games, players are enriched through game play, will arrive.

The arrival and advancement of blockchain technology - with ingrained features like decentralization, security, transparency and freedom - is opening new doors to the world of gaming and changing the way we play games in a way that were previously thought impossible with P2E games being a prime example.

The main objective of P2E games should be, first and foremost, fun to play. It should not ever become a mechanism to simply earn tokens. To achieve such a level of fun game play and enjoyability, we need a well-structured, intuitive and detailed plan for the game.

We aim to create and provide a well-made game to players by doing what we do best. We will employ various methods and designs to preserve the value of our digital assets, along with appropriate rewards for those who have contributed to the game ecosystem in various ways.

# WHAT IS AQUA FARM?

Aqua Farm is an Adventure RPG game based on blockchain technology with a play-to-earn structure. It is built on Polygon blockchain network, based on Ethereum Layer 2. Aqua Farm will be released on both Android and iOS mobile platforms, as well as PC.

Players will get to navigate the vast ocean of Aqua World where they and their Aree will grow stronger together as they explore, survive and fight through various adventures and quests. As the players' Aree grow stronger, more difficult quests and dungeons as well as more lucrative rewards will become available.

Aqua Farm was inspired by the P2E game pioneer, Axie Infinity and a popular anime, Pokemon. We aim to build on our predecessors to provide a more lasting P2E game with more elaborate and sustainable token economics.

Players will be able to earn Power Of Deep Ocean (PODO) tokens through various gameplays which they can then use to farm and stake to earn Aree Shards (AES) tokens. AES tokens then can be used to purchase Aree NFTs and Guardian NFTs to help with their gameplay.

## UNIVERSE

### POWER OF DEEP OCEAN

Our story begins in Aqua World where mankind and magical creatures of all kinds coexist in peace, under the protection and guidance of the mystical World Tree. But one day, monster invaders from another world arrived in Aqua World. The invaders, envious of the world so blessed and fertile, began ravaging and plundering the blessed PODO from Aqua World back to their barren and desolate home world.

As monsters plundered PODO, the fertile ocean of Aqua World became desolate. The World Tree sacrificed AES, its source of power, to create a giant barrier to protect Aqua World from the invaders but as time went on, the barrier began to grow weaker and weaker.

With the help of the Aree, the ocean fairies and the Guardians, the legendary creatures and protectors of the ocean, mankind decided to embark on an adventure to fight back against the monster and take back PODO to restore peace to Aqua World.

# WHAT IS AREE?

THE PLURAL FORM OF AREE IS ALSO AREE.

 **TOGA**

 **LINEA**

 **PEP**

 **RUMI**

Arees are the ocean fairies that are born from the fruits of the World Tree that grows in the center of Aqua World. Arees live in a micro world called Oasis, on the back of Guardians, the ocean protectors. They grow along with players that own them. In the beginning, all players will begin their Aqua World Adventure with basic Arees.

Basic Arees are not NFT-type and cannot be traded among players. Once the players have earned enough AES tokens, they can then use their AES tokens to obtain NFT-type Arees from the World Tree which can grow to help them with their journey at more difficult dungeons.

# GENERATED AREE NFTS

Each Aree will have a combination of 6 different parts such as emblems, belongings, accessories, upper body clothes and lower body clothes. Within each of the 6 parts, different designs will be assigned with different stats. In Aqua Farm, the appearance and characteristics of Aree with the same attribute may be different.

Aree will be assigned one of 4 types and within each type, there are about 11 million combinations of features which will guarantee that your Aree NFT will be more special.

# GROWTH & TYPES

## LEVEL UP

All newly created Aree's grade and level will start at 1. Players can then use Evolution Stones to upgrade their Aree's levels. Evolution Stones can be bought with PODO tokens.

## CLASS UP

Aree will be assigned different classes such as Normal, Rare, Epic and Legend. To be evolved to a higher class, two Aree of the same level that has reached the maximum level of 30 are necessary for the synthesis.

## EFFECTIVENESS

All Aree are born with one of 4 types: Ice (Linae), Wave (Toga), Ground (Pep) and Magma (Rumi), with each type having either nurturing or controlling relationship dynamic with other types. Each Aree will also be assigned their own unique roles and skills.

# GUARDIAN?

Guardians are protectors of the ocean and mode of transportation that allow players to navigate the vast ocean of Aqua World. Also the Oasis which exists on the back of Guardians act as a shelter where Aree can rest in peace.

**LEVEL UP**

Higher Guardian levels which can be upgraded using AES tokens and Evolution Stones, will allow players to control more Aree and Sea animals.

Each Oasis acts as a special and safe place for players within which the players can enjoy games such as fishing to earn resources that can be used to uniquely decorate their Oasis or be used to upgrade Aree and Guardians.

# YIELD FARMING

Guardians, as protectors of the ocean, are the object of admiration for many sea animals. There are many different types of sea animals that follow Guardians around. Higher the level of Guardians, more number of the sea animals that follow the Guardian.

As the number of sea animals increases, the total volume of players' stake cap increases the number of PODO tokens. The sea animals then refine these staked PODO tokens and turn them into AES.

# FARM?

## AQUA UNION

The holders are also able to rent out their Aree to other players to earn fees. And players without Aree can also rent the holders' Aree to increase their farming efficiency.

Farm is a specific parcel of area of sea or land within the vast ocean of Aqua World. Players can become a holder of Farm NFTs. Dungeons will appear on the Farms and the holders must use their Aree to defeat the monsters from the dungeons. The value of the Farms will depreciate if monsters are left unchecked which will eventually decrease the efficiency of the Farms.

If the holders are unable to control the monsters on their Farm, they can get assistance from other players to defeat the monsters and the holders will collect a part of the other players reward from defeating monsters on the Farm.

# GAMEPLAY: BATTLE

## REWARD

Players can navigate the vast ocean of Aqua World to fight and defeat monsters in dungeons and players are able to discover treasure maps in their adventure where they can defeat special monsters to take back PODO that were taken by the monsters.

# GAMEPLAY: ADVENTURE

Special monsters are hiding and lurking deep within the ocean to steal PODO away from Aqua World. The Treasure map is an item that shows where these special monsters are hiding.

Players can discover level 1 treasure maps from dungeons and higher level treasure maps can be found by fishing or be made by players. Players can also buy treasure maps using PODO tokens through the marketplace.

Players can obtain random items through treasure boxes they find as they adventure missions such as exploring deserted islands, surviving hidden traps, or solving puzzles.

# GAMEPLAY

## OASIS

Players can build and decorate their Oasis which exist as a part of their Guardian. Players can also keep and grow their Aree in the Oasis. As a place where Aqua World's energy, Mana Coverage, items are generated randomly in Oasis and players can obtain them through fishing. Once Oasis is ready for guests, players can invite their friends to fish together.

## CRAFTING

Players can collect many types of ingredients and parts that they use to create items to decorate their Oasis during their adventure and while they fish.

Decorated Oasis will be permanently attached to the Guardian and will help to enhance and maximize the value of the Guardian on the marketplace.

# PLAY TO EARN

## HOW TO EARN AES TOKEN

Reward for clearing unknown dungeon, Reward from treasure box, Staking PODO tokens through Sea animals.

## PODO TOKENS

CAN BE EARNED AND USED FOR

- Dungeon Battle
- PvP Arena
- Decorating Oasis
- Fishing
- Draw and Grow rare Aree
- Complete in-game quests
- Staking through Sea animals
- Aqua Union
- League of Aree

Not all players need to engage in battles in Aqua Farm. Aqua Farm offers many non-battle activities for players to immerse themselves in while earning PODO tokens along the way.

# MARKETPLACE

Players can buy and sell NFT-type Area, Guardians and Farms on Aqua Farm Marketplace.  
Company will earn 5% of the fees which will be used to provide better services and better user experience.

# TOKENOMICS

Total Max Supply of AES token: 1,000,000,000 (1B)  
Total Max Supply of PODO token: Infinite supply with supply control mechanism.

P2E games require elaborately structured token economics. PODO (Power Of Deep Ocean) is Aqua Farm's secondary token, it aims to be used for the 'play-to-earn' reward system. PODO token has an infinite supply but it is also designed that total number of PODO tokens will increase as the number of players increase and such an inflationary play mechanism will help to maintain PODO token at a stable price for the sustainable game ecosystem.

# TOKENOMICS

POWER OF DEEP OCEAN  PODO TOKEN

AES (Aree Shards) token plays a critical role of being both the key monetary token and governance token of Aqua Farm. AES token is a deflationary token fixed, it is designed to reward and incentivize players and token holders.

We have determined one token-fits-all approach, while it may work for other projects, was simply not enough and after consulting with blockchain subject matter experts from The Mars Network, we've decided to design and implement our current token economics as it is now to best preserve the value and utility of our tokens.
